Informed Consent for Testosterone Replacement Therapy

The following information will assist you in making an informed decision regarding the use of testosterone therapy. Many of these side effects are rare however have been reported with testosterone use. Please review this information and sign if you agree and understand.

Some known or suspected risks of testosterone therapy include but are not limited to:

- Elevated hematocrit (red blood cell concentration in blood)
- Increased risk of blood clots
- Elevated blood pressure
- Lowered sperm production
- Breast tissue growth (gynecomastia)
- Worsening sleep apnea
- Acne
- Hair loss
- Reduced testicular size
- Prostate cancer progression
- Breast cancer progression
- Elevation in liver function tests
- Possible interaction with medications
- Changes in urinary habits

Testosterone therapy requires close medical monitoring and regular office visits. I agree to be compliant with all scheduled office visits as well as lab testing. I also agree to follow all instructions by the doctor regarding medication doses and timing of administration. I agree not to obtain or take any other hormone therapy or divert medications. I understand that I will not receive any medications or prescriptions if I fail to be compliant with the scheduled program. I certify that I have received and understand I have the right to refuse or discontinue therapy at any time.
